Tussbay, March 14-6 P. M. This has been a day of great excitement in the gold room, and the further decline of the premium has exer-cised a very depressing effect upon the stock and merchangise markets. The pane-like feeling of yesterday was aggravated by the intelligence from Sherman and Schodlaid, and gold, which opened at 184%, and sold at 185 at noon, began after that hour to fall rapidly till it. reached 177% at a few minutes past three. The market ris point was extremely active and in full panic, the g lower than any witnessed since last May. It is a saying in England, "They do these etter in France;" but it may be safely said and the railways of any other country in the world are etter managed than those of the United States. The ur roads seem to be to secure the largest amount of e affairs of their companies by the payment of dividends, regardless of the permanent interests of the progracefully out of repair, by which the lives of pase had abundant opportunity of observing, sacrificed; et at the same t me the roads are being very extravaices to the friends of the officers, and the profits are t unfrequently shared in directly or indirectly by the particular roads are sometimes cooked for stock jobney go to work and add unnecessarily to the expendi-ure, and damage the road as much as possible, so as to it successfully they exaggerate its prosand declare as large a dividend as possible r warranted by circumstances or not. But so long as our railways are mismanaged and neglected as at present their stocks are likely to reflect in their price the opinions of the public regarding them. If a few searching investigations were made into the corruption underlying our railway system, it would have a very salutary effect upon official morals, and contribute to the safety of the travelling public.

The money market has been moderately active to-day at seven per cent on call. In the discount line increasing caution is observed, owing to the heavy decline in gold and the corresponding depression of market values generally. First class paper continues to be quoted at \$

Foreign exchange is weak and very difficult of sale. Bankers' sterling at sixty days has been offered at 107%,

There is some talk of the Secretary of the Treasury anticipating the payment of the May coupons on the five-twenty bonds; but it is improbable that such will take place till near the date of their maturity. Moreover, it is not desirable that the payment should be anticipated in view of the present condition of affairs, and at any time the policy of propaying of interest is questionable.

The subscriptions to the seven-thirty loan con-tinue to range very high. The aggregate last week exceeded twenty-one millions, and the total amount subscribed yesterday was \$5,246,700. The popularity of this form of security would seem to increase with the decline of gold. The First National Bank subscribed \$600,000 yesterday and \$500,000 to-day. The Ninth National Bank yesterday took \$1,500,000.

The business at the Sab-Treasury to-day was as follows:-
